Church Lane

Church Lane is an established group living residential service based in Haringey that offers 6 specialist residential programmes on a medium to long-term basis. It is a mixed gender unit that specifically works with adolescents up to the age of 18 who have experienced abuse, neglect and post traumatic rejection.

Admissions are planned in advance to enable the individuals' objectives and needs to be refined and so that a pre-placement visit can occur by the individual or placing authority.

Practitioners are trained and professionally supervised to deliver The Pillars of Parenting 'Authentic Warmth' model, which is a theoretical model of childcare based on confirmed psychological research and founded upon the impact of parental rejection. This innovative model enables the team to work using appropriate parenting techniques combined with emotional support. Ensuring practitioners are empowered with the psychological theory, knowledge base and skills to understand and respond to the emotional trauma and rejection which many looked-after children endure.

The unit also has a Chartered Psychologist who works weekly with our team to provide an expert clinical oversight and assists to deliver a range of psychological services including: strategising appropriate, targeted interventions; therapeutic communication and regular ongoing assessments to ensure that the young person is progressing and any further needs are being identified.

Our practitioners are experienced in working with children that have been left traumatised by their past and recognise the impact that parental rejection has on the child or young person's emotional development.
